DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Response to Arguments

2. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the elastic bands affixed at two separate points on the mask must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudolph 5265595 in further view of Dyrud et al. 5819731.

6. Rudolph teaches an oxygen mask having an improved means for being secured over the nose and the mouth of a patient, the improvement comprising: a pair of elastic bands (col. 7; lines 28-29), both ends of the each pair affixed at points of attachment 12 to each of both sides of the mask (fig. 1), adjustably securable to the patient by pulling the ends anteriorly through the points of attachment (col. 7; lines 18-29), and wherein the elastic bands are affixed at four separate points on the mask (fig. 4). It should be noted that Rudolph fails to teach wherein the bands are extendible to loop over and around each ear of the patient.

7. Dyrud et al. teaches a mask with common strap for looping around the ear of patient for securing a mask. Therefore it would have been obvious to one of ordinary skill in the art to modify the mask of Rudolph to include the strap of Dyrud et al. to prevent entanglement of the wearer's hair or otherwise ruin the wearer's hair style.

8. As to claim 3, Rudolph/Dyrud teach wherein the elastic bands are affixed at two separate points on the mask (34 or 36).

Conclusion

9. Applicant's amendment dated 09-03-2002 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
